

GET TO KNOW THE TURNER SYNDROME FOUNDATION

We are a nonprofit organization founded in 2010 and located in New Jersey. We create and share many online resources and services for women and girls affected by Turner Syndrome across America and the world. We also host and promote events. Our mission is based on four main goals- Awareness, Advocacy, Research, and Education. The number of programs within each goal is too many to count, and we are continually working to grow our impact. Ensuring those affected by Turner Syndrome have access to comprehensive information, quality health care, and support are of the utmost importance.

To make all of this possible, we rely on the help of dedicated volunteers who believe in the mission. There are occasional in-person volunteer opportunities available, but we always need virtual volunteers! With your support, we can continue to provide affected women, girls, and families with high-quality information and resources.
